GIFT 001:
HOW TO WRITE STORIES FOR CHILDREN

Assignment 1

By
Santa Claus
0000001

Autumn 2016
01 December 2016

Due: Midnight of 1st January 2017.

1. If a child is bad, would you still give him gifts?

(a) Suppose he appologizes, what would you do now?

2. Let the $\sum_{i=1}^n 2i$ be the performance of your leprechauns.

What would be the big-Oh of their performance?

Here is an unrelated table:

i	j	k
1	0	1
2	2	1

Now, let's clear the rest of the page!

3. And keep going \rightarrow here \leftarrow with an example of code:

```
// Change the loop to  $\frac{n(n+1)}{2}$  from i=1 to n
for (int i = 0; i < n; i++)
{
    // Use this phrase:
    System.out.println("I am Santa Claus").
}
```

4. That's it folks!

You can find out more about the syntax at sharelatex.com.

There is also real-time preview software available like Gummi.
